INSTRUCTOR COURSE AGENDA 8 NOVEMBER 2022

NEW ORLEANS

AARC Congress 2022
November 9 - 12, 2022

In Collaboration With:

American Association for
Respiratory Care

Dear Colleagues,

It is our pleasure to welcome you all to the Fundamental Respiratory Care Support Course (FRCS) initial instructor certification course which will be held on 08 November 2022 in conjunction with the AARC International Congress 2022 in New Orleans, USA.

This FRCS course represents the profession of respiratory care, and its success will all depend on how we build, maintain, and conduct this course. Therefore, as you would anticipate, our common goal is to have this course exceed the highest, most advanced standards in the most consistent way possible.

We know and appreciate that all attendees of today's course are highly qualified and well-established speakers and educators, in their own right. Congruent with our ultimate goal of maintaining consistency, this instructor course was developed to demonstrate the role and expectations from a Certified FRCS instructor.

The objective of the FRCS Instructor Certification is to provide instructors with the information they need to operationalize the FRCS curriculum. Coverage of the FRCS curriculum will be standardized, planned, intentional, and meant to endure in this standardized form

We look forward to working with you in the near future

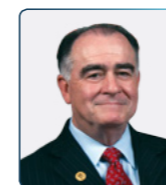

Respectfully yours,
